

**Mission Statement**

Unbound Grace is a non-profit organization with a growing membership of active social stewards committed to promoting the health and well being of each and every individual and family. Our mission is to provide the community with health-centered activities rooted in the ideals of sustainable agriculture, the arts, and classical horsemanship, where individuals of all ages are encouraged to find and share their gifts, talents, and passions

**We know** that when youth are focused on achieving their own goals and dreams, a beneficial side effect occurs - their energy shifts from life avoidance to a healthy hunger for creative achievement.

**We know** that when youth are mentored to find their voice and become Youth Full Leaders within a caring and health focused Mutual Learning Community - the integrity and strength of our home communities are insured.

At Unbound Grace we build resiliency to avoid the many temptations that lead to increasingly risky behavior. There is no amount of money or apologies that can recoup the tragedy of a life lost due to being overlooked. We must be careful to recognize that our youth are not a renewable resource. The common sense prudence of investing in prevention is rooted in our traditional Vermont agricultural values of good stewardship and binds us to our fiscal and ethical responsibility to invest our most precious resource rightly.

Unbound Grace and Sentinel Farms programming will have a direct impact on the future of Vermont youth by fostering opportunities for healthy outdoor activities, where program participants are actively engaged in learning through:

- respectful relationship with all beings
- animal and land stewardship
- cooperative team and community building
- ~ follow through of responsibilities

We are currently working to expand our successful Sentinel Farms Arts, Agriculture and Equestrian Program with Vermont Youth. Our goal is to build a Four-Season Indoor Arena, education, health and wellness space that will allow us to continue our programs through the cold Vermont winter. With a growing membership of active social stewards, we are committed to promoting the health and well being of each and every individual and family. Mentoring Good Stewardship for our youth reminds all of us that with great strength comes great responsibility.

UGSF programming can be duplicated across Vermont and across the nation as two things our rural communities have in abundance are small vacant or underused farms and children in need of a caring community.

# Proposed Four Season Arena , Education, Health & Wellness Facility

**Exterior Rendering** Lower Level to house arena programming, Upper Level to house Education, Health, and Wellness programming

**Interior Rendering**

Our new facility concept is wonderfully and generously designed and rendered by
